WORLDWIDE DELAYS TO BE AWARE OF

USA and Canada

The USA and Canada have experienced their worst winter weather in 5 years. The heavy snow and flooding has caused huge delays in vessel departing, railroad delays and trucking collections.

Although weather has improved there are still many delays effecting current shipments. SCT and our partners in the USA are doing all we can to ensure your freight moves as swiftly as possible and Samantha will keep you updated

Singapore transhipments

Singapore port is currently experiencing delays of approximately 2-3 weeks for all transhipment cargo due to space constraints on vessel to Durban and Cape Town. This has largely been created by peak volumes prior to Chinese New Year. SCT have avoided Singapore transhipment services wherever technically possible but unfortunately from some ports in China there are no direct sailing options and services via Singapore are the only available service. Samantha will keep all effected clients well updated.

Italy, France, Austria, Switzerland

Collection of some orders this week have been affected by heavy snow fall across much of Europe. Our teams in Europe are doing everything possible to ensure delays are minimised for collections in the worst areas affected.

Please be assured we are doing all we can under the circumstance and will keep you updated of any delay's

We thank you for your continued support and partnership
