Update: Strike Action & Transnet Port Delays

Further to the communications last week, the disruptions from the strike are currently minimal and the situation on the ground is returning to normal.

We are now, however, faced with the backlog as a result of this industrial action. Due to the congestion at stacks there were delays in vessels berthing which has had a knock-on effect in many other areas of operations. This delay is compounded by the fact that Transnet has been experiencing technical issues with their NAVIS system, which has resulted in delays to trucks being processed through the terminal.

While the situation is slowly returning to normal, we are cognisant of the fact that it will take some time for the backlog to be processed. We are in communication with all clients affected, if you have any concerns regarding your shipments please don't hesitate to contact our team at any time.

We thank you for your continued support and partnership
