1. Update: Durban Port Situation

While there is the occasional reprieve, the situation at the port remains wholly unchanged. Below is a link to a recent Carte Blanche insert in which the situation was explained in detail. As always, we are proactive in our communication with our service providers and are constantly working with them to ensure that the inevitable delays are minimised.

This week the situation has been exacerbated by heavy winds of up to 80km an hour resulting in Waterside and Landside operations being halted for a time, but the port is working to deal with the backlog caused by this.

2. Space Constraints on Air Freights

Clients are reminded that November and December are exceptionally busy for the airlines and they are already advising that space is at a premium. If you require anything to be air freighted, please advise us as early in the process as possible so that we can alert our partners.

3. Year End Planning

2019 is drawing to a close and we would like to plan in advance so that your shipments are not delayed in any way. Early November we will send out closure forms to our clients, please complete these and send them back to us as soon as possible so that we can pro-actively plan around your shut down. As always, we are only closed over public holidays and a member of staff will always be on standby for emergencies.

We thank you for your continued support and partnership
