29 November 2019

Update: Durban Port Situation

The attached article and letter refer.

The port is still dealing with heavy congestion and improvements are slow.

There is now more information on the truckers strike which was unofficially announced yesterday. While our chosen transport partners have confirmed that they are not participating in the protest action, they are constantly re-evaluating the situation as the threat of violence is always present.

Currently there are confirmed reports that 2 trucks have been burned, and drivers in the queue have been threatened. Several trucking companies have ordered their trucks to return to their depots for the safety of all concerned.

As the situation progresses we will update all of our clients accordingly.

We thank you for your continued support and partnership
