URGENT COMMUNICATION

30 October 2019

Transnet Experiencing Navis Issues

The attached advisory from Transnet refers.

Since 15h00 on the 29th of October there have been issues with the Navis system and all Transnet terminals are affected.

Landside operations have been halted and in Durban the traffic outside the port has backed up considerably.

Our truckers are advising that the queue outside the port is currently around 6km and at this point we have not been advised as to how long the system is expected to be down.

We do anticipate that once Navis is back up and running that Transnet will bring in additional crews to deal with the delays, however, please note that this backlog could take considerable time to clear.

As always we are in constant communication with our truckers to ensure the best possible service to our clients and as the situation progresses we will update you accordingly.

We thank you for your continued support and partnership
