Port Berthing Delays & Port Operational Delays

We continue to experience both delays in the berthing of vessels as well as operational landside delays in the collection of containers ex Durban port. Whilst nothing official has been published providing an explanation, we are led to believe that manpower has been seriously affected by Covid infections as well as inefficiencies created by home working of many port staff with co-morbidities. This is further adding to normal port inefficiencies and constraints and is resulting in delayed delivery of many consignments. Please be assured that SCT is being as proactive as possible in terms of tracking vessels and berthing schedules, as well as working closely with our truckers in planning collection of orders from the terminal. We endeavour as always to keep you as up to date as possible but if you have any specific concerns please do not hesitate to contact us.
